This is the first issue of **beatochess**.

I am currently going through the studies by **Zakhodyakin** in Harold van der Heijden's **HHdbVI** database.

I am also looking at some older studies published in **Shakhmatny Listok**.

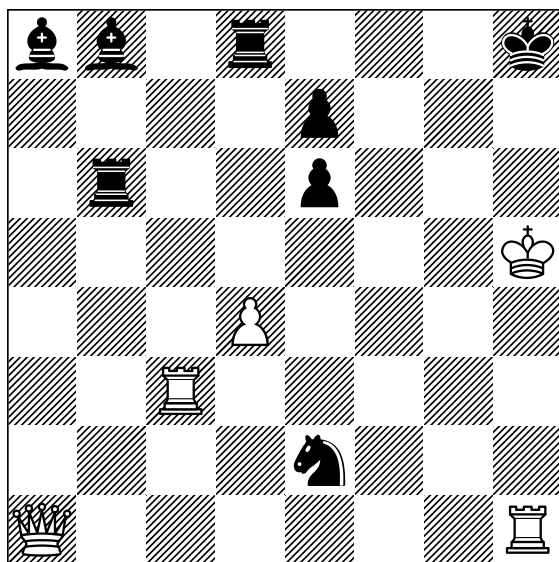

In this issue, you find a few comments, new cooks, and revisions.

Study no. 10 (Table 1)

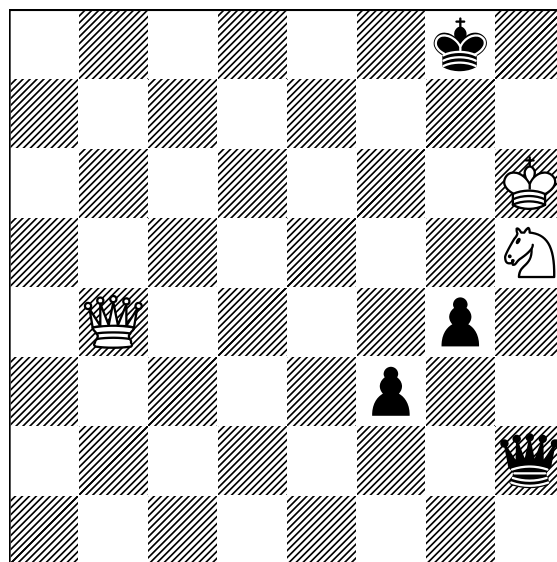

This is an interesting study. The white knight supports the mating attack by four blocks of the black queen checks. Unfortunately, White also wins after **1.Qc4+!**. The second study is a same-material correction, and the third one is a version adding one more block (4.Nh5) in the main line and four blocks in the side lines, leading to a total of nine knight blocks.

Lapin/Garcia +0113.13c3e2 (1930). Cook?

Date: 2024, March 16

File: Lapin1930.pgn

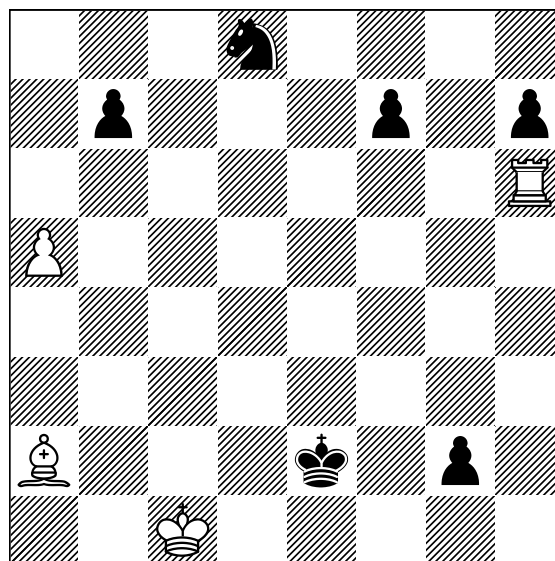

The correction by Garcia is not convincing. It seems that **2. Bc4+ Kg1 3. Rh5!** (instead of 3.Rxh7) leads to an alternative win, although the lines are a bit murky.
