Helmut Waelzel. "White king in the center or on the kingside would lose one of the pawns d7, f7, h6 with check, so it needs exile on the queenside. There, for reasons of Zugzwang also, squares b2 and a3 are needed, a plan that cannot be delayed. A shocking key! Astonishing, that Black can not make use neither of the passed pawn itself nor of squares c2 and a2 of this queen. White king is manoeuvring against black queen, including quiet moves and even Zugzwang (position after 5.Kd3! is one, with thematic try 5.Ke2?, position after 8.Kb1! would be another, apparently without try)."

### Mattison +0133.12h3a6 (1922). Correction

Date: 2024, October 22

File: Mattison1922.pgn

#### Study no. 47 (Table 1)

The suspected cook by John Nunn is indeed a cook according to tablebase. The correction by Garcia is incorrect for the same reason: the Q-bn ending is lost. The additional black pawn on h4 gives black just enough counterplay.
