In this issue you find

- a recent study published in *Problem Paradise*
- five original studies
- and comments on and revisions of studies by Zakhodyakin, This continues the work started in **beatochess no. 01**.

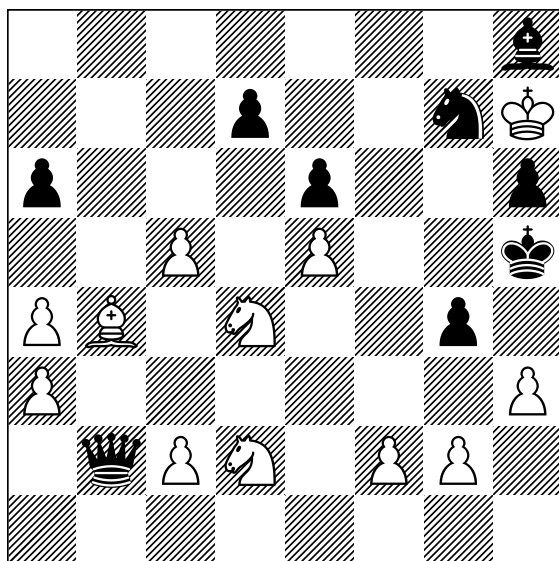

New study

Published in: **Problem Paradise** no. 105 (vol. 27), January-March 2024.

File: Neuenschwander-2024-ProblemParadise105.pgn

Comment by Ryo Shiomi (editor): “The starting position looks quite complicated, but after the variation we reach the position with a clear-cut theme, where the WB’s corner to corner movement saves the game. Fantastic!”

=0002.02c8e8 (1949). Correction

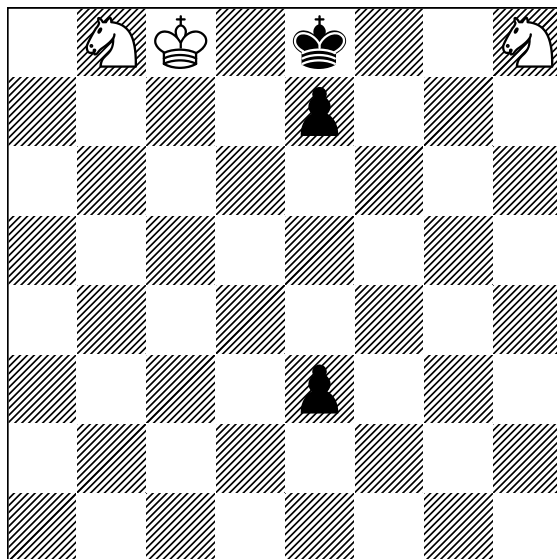

Date: 2024, April 4

File: Zakhodyakin1949.pgn

Study no. 71 (Table 1 in beatochess-01)

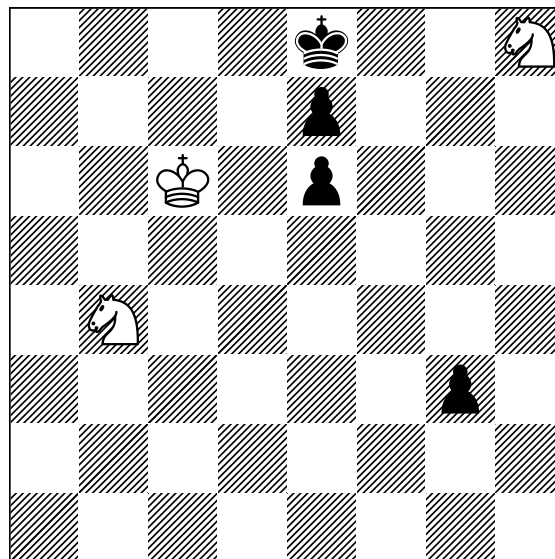

Adding a black pawn on e6 correct the study. However, there are two interesting features which do not change the content of the study. First, the white king could as well be on c6. Second, the black pawn could be on g3. The latter allows the black knight to be on b4 rather than b8, which makes the first move even more suprising. The correction uses these findings.

+3200.33g1h4 (1967). Version

Date: 2024, April 7

File: Zakhodyakin1967.pgn

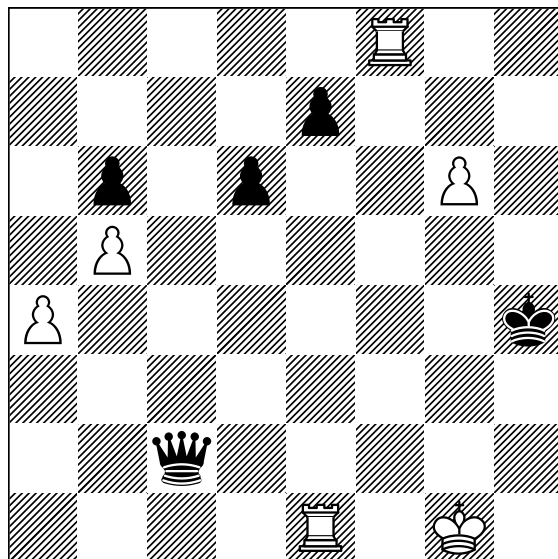

Study no. 107 (Table 1 in beatochess-01)

The RRvsQ ending seems difficult to fix: the white rooks are simply too strong given the bad position of the black king. In addition to the cook on move 1, there is also the alternative win **4.Rg1** in the main line.

The version shows the theme (luring the black queen to g7 and trapping it) with a white knight and rook.

=4016.21a1c1 (1931). Correction

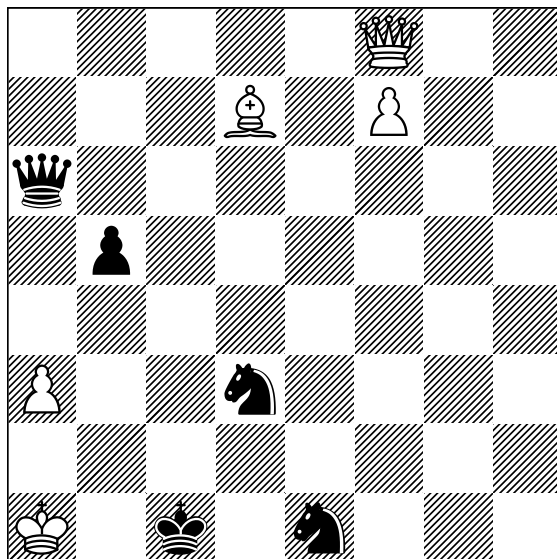

Date: 2024, April 20

File: Zakhodyakin1931d.pgn

Study no. 16 (Table 1 in beatochess-01)

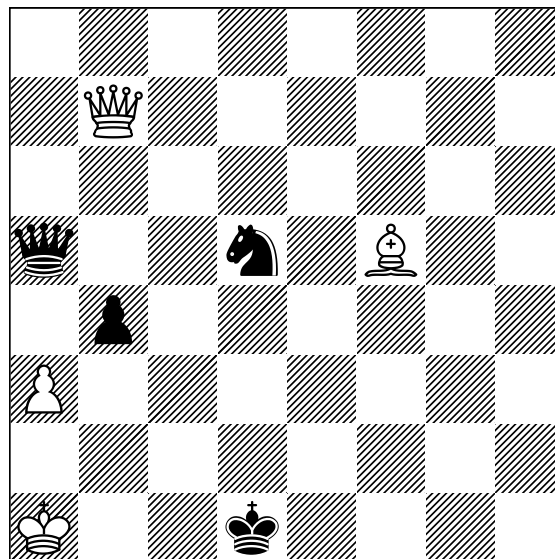

The correction of the prize winner is even shorter than the original, but it keeps the main ideas (bishop inference sacrifice and queen sacrifice leading to stalemate).
